36. The method of Claim 35, wherein providing the array of pressure sensing pixel capacitors comprises applying the array of pressure sensing pixel capacitors on both faces of the sail; and wherein producing real time distribution maps comprises producing distribution maps of differential pressure on the windward and on the leeward face of the sail.

It is believed that all of the claims are patentable over the prior art.

For better readability and the Examiner's convenience, the newly submitted claims differ from the translated counterpart claims which are being canceled. The newly submitted claims do not represent changes or amendments that narrow the claim scope for any reason related to the statutory requirements for patentability.
